METTLER TOLEDO

METTLER TOLEDO

Your OEM partner for all weighing solutions

From scales to high speed automation, METTLER TOLEDO is the global leader in solutions for static, dynamic, automatic, and integrated weighing applications.

Off the shelf...

Our weighing solutions are well known for both reliable and accurate operation. With METTLER TOLEDO as your OEM partner, you will have access to the best weighing technology available in the world.

You can choose from a wide variety of load cells, sensors, and terminals that are already designed and used.

... or customer specific

Tap into the industry's best research and development team to build a weighing solution tailored to your exact needs. We can solve customer problems by developing innovative technologies. These technologies provide precision control through accurate weighing and measuring. We not only offer solutions, but also a global service network for local support.

Stay up to spec with our weighing products

METTLER TOLEDO offers the broadest range of worldwide-approved weighing components and solutions.

Many weighing systems require approvals by local and international authorities. METTLER TOLEDO offers you the broadest range of worldwide-approved weighing equipment and accessories. You can also benefit from the largest range of approved hazardous area (Ex) weighing solutions.

Global regulatory compliance

- MinWeigh
- Haz Area approved: ATEX, FM, CSA
- GMP and cGMP compliance
- GAMP compliance
- OIML and NTEP approved
- Hygienic designs

With METTLER TOLEDO, you have a partner from 'Start to Finish'

Your requirements

It all starts with your needs. Our professionals take your requirements and provide sound consultation and comprehensive engineering to develop an innovative, tailored solution.

Special Purpose Load Cells

- Designed to meet specific needs
- Tension or compression

METTLER TOLEDO offers high performance components for safe, reliable operation even in harsh environments.

Smart Load Cells

- Small bench or floor scales
- On board diagnostics

High Precision Sensors

- Fast
- Accurate from milligrams to kilograms
- Rugged
- Direct connectivity

Compression Canisters

- Vehicle & floor scales
- Tank & hopper weighing
- Coil weighing

Weigh Modules

- Static or dynamic loading
- Off the shelf availability

Transmitters

- DIN rail or field mounting
- CalFREE option
- Direct connectivity

Indicators and Terminals

- Panel or field mounting
- Direct connectivity
- Solutions for all weighing applications

Backed by our offering and know-how

Testing

No weighing solution is complete without testing. METTLER TOLEDO has the broadest testing capability for weighing solutions in the world. You will have the confidence that our components will help your customer make a great product with your equipment. Not just a good one.

Direct Connectivity

METTLER TOLEDO solutions collect process data and facilitate its processing and transfer to management information systems. Protocols supported include TCP/IP, ControlNET, Ethernet IP, PROFIBUS DP, MODBUS Plus, Devicenet, Allen-Bradley RIO, 4-20mA/0-10V, RS422/485, RS232 and discrete digital I/O.

World-class Manufacturing

Our state-of-the-art facilities are located on three different continents. They build your weighing components and deliver them according to your schedule. To ensure quality and a safe environment, all our operating units are certified to international quality and environmental standards.

Engineering Support

Our engineering professionals design and integrate OEM components and systems directly into your product according to your specifications. From planning through design and testing and agency approval, METTLER TOLEDO is with you all the way.

Electronic Solutions

We provide all the necessary electronics and software to facilitate fast, accurate and reliable integration with your product. Our instruments and application specific software integrate easily into IT environments, enhancing safety and efficiency as well as guaranteeing compliance.

Global Service and Support

Service and support should be driven by the impact each instrument has on your business goals, as measured by the cost of inaccuracy, substandard quality, downtime or non-compliance with regulations. Using a strategic process, our consultative service approach examines how critical each instrument is to your operations. Then we tailor a service and support strategy to best support your success.

Your solution

Once your product has been designed, our state-of-the-art manufacturing facilities build the highest quality product for you.

Your reputation

Maintain your reputation with our global training and support to ensure your product operates reliably, safely, and at peak performance.

Application Specific Weighing

Solutions that have been developed to meet the exact needs of your application make integration easy and save time and money.

Process Applications

High accuracy in batching, filling and inventory brings you consistent quality, shorter batch and filling times, and better control of your material stock. Everyday, with every filling, with every batch.

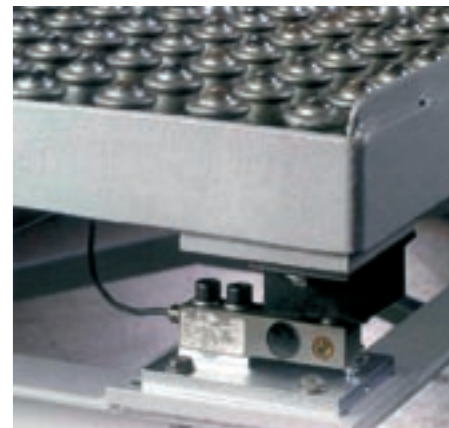

Machine Builders

From feathers to steel coils, from micrograms to tons, your weight information is fast, accurate and reliable.

In Motion Weighing

In transport or checkweighing, fast, reliable and accurate measuring is a must. It not only saves time, but also guarantees the safety of your transports and compliance with packaging ordinance.

ServiceXXL®

Tailored Services

Equipment Services

Ensuring that your equipment is correctly installed, calibrated and maintained is critical if you want to minimize lost revenue, service costs and unscheduled downtime. Our equipment services include:

- **Installation** - Trained professionals ensure instruments are properly configured and operate flawlessly from the start.
- **Calibration** - We identify, correct, and document deviations in your measuring instruments and weights.
- **Preventative Maintenance** - Deploying proactive service ensures maximum uptime for your equipment.
- **Repair Service** - Factory-trained professionals make repairs in the field and at our in-house workshops.
- **Parts** - Genuine METTLER TOLEDO® parts ensure you get the best quality.

Compliance Services

Our compliance services help you meet the requirements of operating in regulated industries. In addition to the qualification and validation of our equipment, we can provide the necessary support documents. This reduces the risk of fines or even shutdowns.

Remote and Support Services

METTLER TOLEDO offers services to diagnose and repair system faults without the time and expense of an on-site visit. System downtime is eliminated or reduced and costs are minimized. Our software support programs provide hotline support and access to features and functionality enhancements.

Specialty Programs and Resources

We also use our vast expertise to customize service programs, such as:

- Comprehensive, full service contracts
- Multi-vendor service management
- Project management
- Upgrade rollouts
- Data collection and/or service reporting
- Training programs
- Technical and additional support for in-house service staff
